Just for fun, try out-thinking this blob and keep it from killing itself! It doesn't even know what a pattern is...oh, and in case you're wondering, Blob Ball has no relationship whatsoever to the rest of KLAX, it's just sort of there...

HOW TO PLAY

You play KLAX by moving your paddle left and right and using it to put tiles in the "bin". Your paddle can move to one of 5 positions on the screen:

As tiles move down the conveyor, use your paddle to catch them.

Press the A Button to flip the top tile on your paddle off into the bin below. You can press UP on the Control Pad to throw the top tile on your paddle half way up the conveyor.

Also, you can press DOWN on the control pad to accelerate the tiles on the conveyor. Use this feature with caution.

There are up to 8 total colors in the game, plus the wild tile.
(The wild tile is a flashing block that will substitute for any color.)

The paddle can hold up to 5 tiles.

Drop meter

If you do not catch a tile with your paddle, it will drop to its death and your drop meter will increase. You have a limited number of drops before your game is over. When all the lights are ON, your game is over!
